**Get Your Dream's Worth.**

**B**ecause the Catalina 36 is easily handled by a couple, has a big comfortable cockpit, a spacious interior with two private cabins and the integrity to pursue cruising dreams, many experienced sailors consider the Catalina 36 the perfect boat for their sailing lifestyle.

The Catalina 36markII has all the important characteristics that made the original the most popular thirty-six foot sailboat in the world. The 36mkII is built to be the same seakindly moderate displacement hull that tracks surely and performs well in a variety of conditions. The deck is the classic trunk cabin configuration designed by sailors, not stylists, so it's proven, comfortable and functional.

The 36 is the evolution of this successful design and incorporates the refinement that is possible only after building well over 2,000 36's and listening carefully to owners comments and suggestions.

The beautiful and functional aft cabin is complete with a large athwartship double berth, hanging locker and bureau.

The owner's cabin forward is comfortable and well ventilated and has a private entrance to the head.

Cruisers love storage space and the Catalina 36 is renowned for it. There are ample drawers, lockers and bins for all your cruising provisions and gear.

The galley and main cabin have received special attention to design and detail.

The galley is a functional 'U' shape, with composite counter tops and sinks that are near the centerline for proper drainage underway. The large refrigerated ice box is aft and a dry food locker is forward. A gimbaled, stainless steel LPG stove with oven is standard equipment.

The main cabin can be arranged with a dinette or traditional table at your option.

## *Catalina 36mkII*

An important but often unconsidered aspect of boat ownership is maintenance. The latest 36 has stainless steel hand rails and anodized spars, reducing maintenance on deck and extending your sailing season.

The mechanical, electrical and plumbing systems have been reengineered to increase dependability and accessibility. Engine access, for example, is excellent with the one piece insulated enclosure removed.

Aft of the engine, a mechanical compartment contains the engine valves and filters. This makes maintenance and service easier.

The structural system and construction of the 36 is proven and straightforward. The hull structure is rugged, hand-laminated, solid fiberglass; the keel is antimonial lead with integrally cast stainless steel bolts.

The mast is stepped through the deck on the keel and has inline spreaders and fore and aft lower shrouds, a sturdy arrangement that is easy to tune.

Board a Catalina 36mkII, inspect her thoroughly and discover why the 36 has become the sailors choice for over two decades.

The two seats and game table to starboard can be made into a settee or berth with the cushions provided. The entertainment center cabinet can be fitted with a stereo and concealed TV. All interior teak has the warmth and durability only obtained with multiple coats of varnish.

All interior finishes and fabrics have been selected for quality, appearance and durability.

Traditional table shown,  
a "U" shaped dinette is also available
